### Profile

Full-Stack Developer with one year of project-based training, working across PHP/Laravel and JavaScript (Node.js, Express, React, MongoDB). I have designed 95+ RESTful API endpoints across 6 projects using layered architectures, Sanctum/JWT authentication, role-based access control, queued jobs, Redis caching and automated testing, and built React dashboards on top of them. Currently training at Bytes4Future (Aga Khan Foundation).

### Technical Skills

**Backend:** PHP 8, Laravel, Node.js, Express.js, RESTful APIs, API versioning

**Architecture:** OOP, MVC, SOLID, Repository & Service patterns, Events, Queues & jobs, Cron scheduling, WebSockets (Pusher)

**Security:** Laravel Sanctum, JWT, RBAC, Policies, Form Request, Zod

**Databases:** MySQL, PostgreSQL, MongoDB, Redis, Eloquent ORM, Transactions

**Frontend:** JavaScript (ES6+), React, Tailwind CSS, Blade, HTML5, CSS3

**Testing & Tools:** Pest, PHPUnit, Unit testing, Postman, Git, GitHub, GitHub Actions, Docker

**Soft Skills:** Teamwork, Communication, Technical documentation

### Professional Experience

**Full-Stack Developer Trainee** | Bytes4Future, Aga Khan Foundation (AKF) Aug 2026 – Present

- Training across 3 parallel tracks: full-stack development (JavaScript, Node.js, Express.js, React, Java), Soft Skills and Business, and English.
- Co-developed a full-stack academy platform with a team of 3, exposing 34 REST endpoints consumed by a 13-page React dashboard.

**Backend Developer Trainee** | focal X Sep 2025 – Aug 2026

- Completed two 4-month backend internship tracks (Level 1 and Level 2), building production-style Laravel APIs against real business requirements.
- Shipped 60+ REST endpoints across 3 Laravel APIs, applying Repository and Service patterns, domain events, queued jobs and Sanctum authentication.
- Collaborated in teams of 2–3 developers via Git and GitHub, documenting all 3 APIs with Postman collections.

### Selected Projects

**HireHub | Freelance Marketplace API** (Individual)
Laravel 12, MySQL, Sanctum, Events | github.com/hasan123dayoub-del/HireHub

- Architected a 21-endpoint API serving 3 roles (client, freelancer, admin) over 10 Eloquent models, with Repository and Service layers and an event-driven proposal flow following the Open/Closed principle.
- Eliminated N+1 queries with eager loading and withCount, cached admin analytics for 10 minutes, and logged request latency through custom middleware.

**NewsRoom | Headless CMS API** (Individual)

Laravel 11, Sanctum, Redis, MySQL | github.com/hasan123dayoub-del/NewsRooom

- Engineered 17 endpoints across 2 API versions (web and mobile), decoupled through repository interfaces and contextual binding in the Service Container.
- Prevented cache stampedes with Redis atomic locks, rate-limited the API to 60 requests per minute, and scheduled monthly archiving and weekly report jobs.

**Institute Management System | Full-Stack Platform** (Team of 3)

Node.js, Express 5, MongoDB, React 19, Tailwind CSS | github.com/hasan123dayoub-del/Institute-Management-System

- Developed an academy platform for 4 roles (admin, secretary, teacher, student) with JWT authentication, Zod validation and MongoDB transactions for multi-document updates.
- Automated course closing and student promotion with node-cron jobs, verified by 14 unit tests, and built analytics dashboards with Recharts.

**LazyRoom | Multi-Vendor Ordering API** (Team)

Laravel 12, Sanctum, MySQL | github.com/hasan123dayoub-del/LazyRoom

- Implemented the order, wallet and admin modules of a 26-endpoint marketplace API, securing payments with transactions and pessimistic locking to prevent double-spending.

**Alumni Network | REST API** (Team)

Laravel, Sanctum, Pusher, Redis, Pest | github.com/hasan123dayoub-del/Alumni-Network

- Owned the notifications module: domain events, queued jobs and real-time Pusher delivery, covered by Pest tests.

**Property Management System | Booking Platform** (Team)

Laravel, Blade, Tailwind CSS, MySQL | github.com/hasan123dayoub-del/property-management

- Created booking workflows, role-based authorization for 3 roles, reviews and ratings, and paginated dashboards.

## Certifications

**Professional Program in Web Development** Jul 2026

Passed with Distinction (55 hours) | American Institute for Applied Education (AIAE), CertiPro | Authorized Training Center: focal X | Credential ID TPCSY26-0000104603

**Web Development, Back-end Level 2** Aug 2026

focal X | 4-month internship program | Credential ID CERT-10-UI-3069

**Web Development, Back-end Level 1**

focal X | 4-month internship program | Credential ID 9PED0SS3Z08

## Education

**Bachelor of Engineering, Informatics Engineering (Software Engineering)** 2022 – 2027 (expected)

University of Latakia, Syria

## Volunteering

**Youth Volunteer** | United Nations (UN) 2020 – 2022

- Co-organized community activities for people with special needs, food-distribution drives and awareness theater performances over 2 years.

## Languages

**Arabic:** Native | **English:** Elementary, actively improving through the Bytes4Future English track
