Profile

Junior Full-Stack Developer with 13 months of project-based training in Laravel and Node.js/React. Built 38 REST endpoints across 2 solo API projects (HireHub, NewsRoom) and contributed to 4 team projects, using layered architectures, Sanctum/JWT authentication, role-based access control, queued jobs, Redis caching and automated tests. Currently training on-site at Bytes4Future (Aga Khan Foundation). Seeking a junior full-stack role (open to remote, on-site or relocation).

Technical Skills

Backend: PHP 8, Laravel, Node.js, Express.js, RESTful APIs, API versioning

Architecture: OOP, MVC, SOLID, Repository & Service patterns, Events, Queues & jobs, Cron scheduling, WebSockets (Pusher)

Security: Laravel Sanctum, JWT, RBAC, Policies, Form Request, Zod

Databases: MySQL, MongoDB, Redis, Eloquent ORM, Transactions

Frontend: JavaScript (ES6+), React, Tailwind CSS, Blade, HTML5, CSS3

Testing & Tools: Pest, PHPUnit, Unit testing, Postman, Git, GitHub

Professional Experience

Full-Stack Developer Trainee | Bytes4Future, Aga Khan Foundation (AKF) | On-site — Aug 2026 – Present

- Training across 3 parallel tracks: full-stack development (JavaScript, Node.js, Express.js, React), Soft Skills and Business, and English.
- Co-developed the Institute Management System (see Projects) with a team of 3: 34 REST endpoints consumed by a 13-page React dashboard.

Backend Developer Trainee | focal X | Remote — Sep 2025 – Aug 2026

- Completed two 4-month remote backend internship tracks, Level 1 (Sep 2025 – Jan 2026) and Level 2 (Mar – Jul 2026), building production-style Laravel APIs against real business requirements.
- Worked on 3 Laravel APIs (60+ REST endpoints in total), applying Repository and Service patterns, domain events, queued jobs and Sanctum authentication.
- Collaborated in teams of 2–3 developers via Git and GitHub, documenting all 3 APIs with Postman collections.

Selected Projects

Institute Management System | Full-Stack Platform (Team of 3) — Oct 2026

Node.js, Express 5, MongoDB, React 19, Tailwind CSS | github.com/hasan123dayoub-del/Institute-Management-System

- My part: the frontend foundation (light/dark theme, auth, API client, role-based layouts and routes), the dashboard and secretary pages, plus backend fixes (auth, middleware, model constraints) and the services layer.
- Team: academy platform for 4 roles (admin, secretary, teacher, student) with JWT authentication, Zod validation and MongoDB transactions for multi-document updates.
- Team: course closing and student promotion automated with node-cron jobs and verified by 14 unit tests, with analytics dashboards built in Recharts.

Alumni Network | REST API (Team) Jul – Aug 2026

Laravel, Sanctum, Pusher, Redis, Pest | github.com/hasan123dayoub-del/Alumni-Network

- Built three modules: university events (CRUD, registration, attendance, reminders), notifications (endpoints, queued jobs, real-time Pusher delivery) and password reset/change.
- Covered the events and notifications modules with Pest feature tests.

LazyRoom | Multi-Vendor Ordering API (Team) May 2026

Laravel 12, Sanctum, MySQL | github.com/hasan123dayoub-del/LazyRoom

- Implemented the order, wallet and admin modules of a 26-endpoint marketplace API, securing payments with database transactions and pessimistic locking to prevent double payments.

NewsRoom | Headless CMS API (Individual) May 2026

Laravel 11, Sanctum, Redis, MySQL | github.com/hasan123dayoub-del/NewsRooom

- Engineered 17 endpoints across 2 API versions (web and mobile), decoupled through repository interfaces and contextual binding in the Service Container.
- Prevented cache stampedes (many requests rebuilding the same cache at once) with Redis atomic locks, rate-limited the API to 60 requests per minute, and scheduled monthly archiving and weekly report jobs.

HireHub | Freelance Marketplace API (Individual) Apr 2026

Laravel 12, MySQL, Sanctum, Events | github.com/hasan123dayoub-del/HireHub

- Architected a 21-endpoint API serving 3 roles (client, freelancer, admin) over 10 Eloquent models, with Repository and Service layers and an event-driven proposal flow that can be extended without rewriting existing code (Open/Closed principle).
- Eliminated N+1 queries with eager loading and withCount, cached admin analytics for 10 minutes, and logged request latency through custom middleware.

Property Management System | Booking Platform (Team) Dec 2025 – Jan 2026

Laravel, Blade, Tailwind CSS, MySQL | github.com/hasan123dayoub-del/property-management

- Created booking workflows, role-based authorization for 3 roles, reviews and ratings, and paginated dashboards.
- My part includes property reports, employee-to-customer communication, and optimizing the auth and review modules (ReviewResource).

Certifications

Professional Program in Web Development Jul 2026

Passed with Distinction (55 hours, Mar – Jul 2026) | American Institute for Applied Education (AIAE), CertiPro | Authorized Training Center: focal X | Credential ID TPCSY26-0000104603 (verify: aiae.us/verification)

Web Development, Back-end Level 2 Aug 2026

focal X | 4-month internship program | Credential ID CERT-10-UI-3069

Web Development, Back-end Level 1

focal X | 4-month internship program | Credential ID 9PED0SS3Z08

Education

Bachelor of Engineering, Informatics Engineering (Software Engineering) 2022 – 2027 (expected)

University of Latakia, Syria

Languages

Arabic: Native | **English:** B1, actively improving through the Bytes4Future English track
